EXPERIENCE

PHP Developer

Nextac LLC

📅 May , 2024 - Present

I am currently working on a Guinness Press system, which is a research paper publishing platform. This platform is static, and I will convert it into a dynamic one using Laravel. This will allow authors to publish research papers and enable admins and reviewers to easily manage the system through a dashboard.

PHP Developer

OneClick

📅 March, 2023 - May 2024

I completed an unfinished office management system for our own office, using Laravel. I added several functionalities to the task management system. Currently, this management system is utilized by approximately 40 people daily.

PROJECTS

Human Resource Managment

📅 Jan 2024 - April 2023

Independently developed a comprehensive management system integrating employee management, attendance tracking, leave management, payslip generation, allowance management, and noticeboard functionalities

Mart Managment system and POS

📅 April 2024 - Ongoing

Developing an independent Mart Management System to handle stock, purchase, sales, returns, and reports. This system includes role-based access for customers, suppliers, and administrators, ensuring efficient warehouse management across multiple locations.

SKILLS

HTML

CSS

Javascript

Bootstrap

JQuery

GIT

PHP

Laravel

MYSQL

EDUCATION

Interemdate

Govt Superior Science Collage

📅 2017 - 2019

Matricualation

FJ Grammer School

📅 2015 - 2017

CERTIFICATION

Diploma in Software Engineering

Aptech - Shahrah e Faisal Center

📅 March, 2020 - March 2024

Both projects' code is available on GitHub
